

# OCEAN REPORT CARD

## JELLYFISH

| SUBJECT            | GRADE | COMMENTS   |
|--------------------|-------|--|
| Physical Education | C-    | Moves gracefully, but doesn't exactly have the speed or agility of some other species. Mostly seems to drift with the currents, using minimal effort to glide through the water. |
| Critical Thinking  | D     | Doesn't even have a brain! But does use its simple nervous system effectively to respond to the environment.   |
| Music              | F     | Not much of a musician. Still unsure about their ability to produce or detect sounds.  |
| Drama              | B     | A minimalist performer, but absolutely mesmerizing to watch.   |

### TEACHER COMMENTS:

Doesn't take easily to learning, but considering they lack a brain, hard to judge. Does very well with the resources they have and is able to adapt and survive well in tough conditions.

May need to work on communication skills - can lash out with a sting if feeling threatened rather than resolving conflict peacefully.

*All animals adapt to their environment in different ways and get A's across the board for surviving in our oceans!*
